The Simple Six How to Maintain the Squaw Run Watershed in Fox Chapel from Home

1. If you don't drink it, you don't dump it!

Anything you would not put in your body's system should not go into your sanitary or storm sewer system.

Do not treat your lawn before it rains.

That is like rinsing the contents of your wallet right down the drain, and it contaminates the watershed!

3. Sweep sidewalks and driveways.

Rinsing debris or spills down the storm drain puts chemicals and unnatural sediment into the water system.

4. Pick up after your pet.

In addition to keeping your neighborhood clean, picking up pet waste prevents harmful bacteria from entering Squaw Run or the Allegheny River.

Properly dispose of chemicals.

Call the Allegheny County Health Department, Public Drinking Water & Waste Management Recycling Program, at 412/578-8390 to dispose of cleaners, paint, automotive products (motor oil, antifreeze, etc.), and other hazardous materials. If it is dangerous for you, it is dangerous for our water!

6. Make a difference with your lawn.

Redirect your downspout into your garden, create a rain garden or install a rain barrel. They will keep your property from eroding and could lower your water and sewer bill.
